

ROBERT HAYE

FULL-STACK SOFTWARE DEVELOPER | SOFTWARE ENGINEERING | WEB & MOBILE DEVELOPMENT

Zagreb, Croatia | +385 98 904 9913 | haye.robert@yahoo.com | roberthayeportfolio.com | github.com/roberth6060

PROFESSIONAL SUMMARY

Full-stack software developer with a B.S. in Web & Mobile Computing from Rochester Institute of Technology and an MBA from Chapman University. Experience developing, maintaining, debugging, and testing web and mobile applications using Java, JavaScript, TypeScript, React, Node.js, Spring Boot, PHP, SQL, MongoDB, GraphQL, REST APIs, and related technologies. Academic and professional experience includes full-stack development, object-oriented programming, databases, client-server networking, secure web development, Android development, UX/UI, testing, deployment, and Agile collaboration using Git, Jira, and Confluence.

TECHNICAL SKILLS

Languages	Java, JavaScript, TypeScript, Python, PHP, Kotlin, C++, SQL, HTML5, CSS3/SASS
Frontend	React.js, Redux, Bootstrap, responsive design, DOM manipulation, Jetpack Compose
Backend & APIs	Node.js, Express.js, NestJS, Spring Boot, PHP, REST APIs, GraphQL, Apollo Server, TypeGraphQL, AJAX
Databases	PostgreSQL, MySQL, MongoDB, Firebase, SQLite, Room, SQL/NoSQL, data modeling
Mobile	Android, Kotlin, Android Studio, Jetpack Compose, Flutter, React Native, Cordova, Room, ViewModel
Security	OWASP Top 10, SQL injection, XSS, CSRF, hashing, encryption, OWASP ZAP
Networking & Systems	Client-server architecture, Java networking/sockets, multithreading, HTTP, Linux
Tools & Practices	Git/GitHub, Jira, Confluence, Agile/Scrum, debugging, testing, requirements analysis, technical documentation

PROFESSIONAL EXPERIENCE

Full-Stack Developer | ArisGlobal / Amplexor

June 2023 - January 2024 | Zagreb, Croatia

- Maintained and updated enterprise software using front-end and back-end technologies.
- Investigated Jira issues, reproduced problems, identified root causes, implemented fixes, and tested changes to prevent regressions.
- Worked on Jira tasks involving technologies including Java, React, and C++, adapting to unfamiliar areas of an existing codebase.
- Collaborated with developers and cross-functional team members in an Agile/Scrum environment using Jira and Confluence.

Supply Administration and Operations Specialist | United States Marine Corps

December 2012 - May 2018 | United States

- Supervised the execution and documentation of more than \$3.5 million in organizational expenditures.
- Led personnel and coordinated supply operations while maintaining resource accountability and procedural compliance.
- Developed leadership, problem-solving, documentation, and attention-to-detail skills in a high-accountability environment.

EDUCATION

B.S. Web & Mobile Computing | Rochester Institute of Technology (RIT Croatia), Zagreb Campus

Sep 2022 – Jul 2026

Technical curriculum spanning software development, full-stack web, databases, networking, security, mobile development, UX/UI, testing, and deployment.

Master of Business Administration | Chapman University - Prague MBA Program, Czech Republic

Oct 2020 – May 2022

Graduate business education in management, leadership, strategy, and organizational decision-making.

B.A. Business Administration | American Military University

Sep 2015 – Jun 2020

SELECTED TECHNICAL COURSEWORK

Computer Problem Solving I / II: Java, object-oriented programming, classes, inheritance, interfaces, arrays, data structures, control flow, I/O, and problem solving.

Web and Mobile II: Full-stack development with HTML5, CSS3, JavaScript, PHP, MySQL, AJAX, HTTP, Bootstrap, forms, validation, authentication concepts, and frontend/backend/database integration.

Database & Data Modeling: Relational database design, SQL, data modeling, normalization, relationships, and database-backed application development.

Designing the User Experience: HCI, wireframes, personas, task scenarios, user research, usability testing, heuristic evaluation, accessibility, and universal design.

Foundations of Mobile Design: Mobile prototyping and cross-platform development with Figma, React Native, Flutter, Cordova, REST APIs, JSON, and responsive web technologies.

Mobile Application Development II: Native Android development with Kotlin, Android Studio, Jetpack Compose, Room, ViewModel, navigation, APIs, coroutines, permissions, location, and architecture concepts.

Secure Web Application Development: OWASP Top 10, ZAP, SQL injection, XSS, CSRF, hashing, encryption, profiling, load testing, heap/memory analysis, and secure web architectures.

Senior Development Project II: End-to-end software delivery including UX/frontend, backend/database, integration, testing, deployment, documentation, traceability, status reporting, and sponsor presentations.

SELECTED SOFTWARE PROJECTS

HabitFlow - Native Android Habit Tracking Application

Kotlin | Jetpack Compose | Room | ViewModel | Android

- Designed a native Android productivity application for creating, editing, deleting, and completing daily habits.
- Applied Jetpack Compose UI, Room local persistence, ViewModel state management, multi-screen navigation, statistics, categories, and reminder concepts.

Haunted House in Hollywood - Networked Java Game

Java | JavaFX | Client-Server Networking | Multithreading

- Developed a Java/JavaFX game with keyboard-controlled movement, collision logic, automated ghost movement, and GUI functionality.
- Designed multiplayer client-server networking with multithreaded connections, chat/player tracking, IP/port communication concepts, and technical documentation.

ISTE-240 Full-Stack Team Web Application

HTML5 | CSS3 | JavaScript | PHP | MySQL | HTTP

- Served as one of the main programmers and helped design and code the team website from start to finish.
- Applied course full-stack concepts including frontend development, server-side PHP, database connectivity, HTTP processing, forms, validation, and team documentation.

ISTE-442 Secure Web Application Project

Web Security | OWASP ZAP | Profiling | Load Testing

- Built and evaluated a web application through architecture/technology decisions, frontend and backend development, functionality implementation, and performance analysis.
- Applied security analysis with OWASP ZAP and course practices covering common web intrusions, profiling, load testing, and memory analysis.

Calendar Application

React | TypeScript | Node.js | GraphQL | MongoDB | Redux

- Developed a full-stack calendar application with a React/TypeScript frontend and Node.js/GraphQL backend.
- Used Apollo Server, TypeGraphQL, MongoDB, and Redux for API, persistence, and application state management.

ACHIEVEMENTS & PROFESSIONAL STRENGTHS

- Recipient of the Navy and Marine Corps Achievement Medal (2015).
- Leadership, teamwork, problem solving, debugging, technical communication, customer service, attention to detail, adaptability, presentation, negotiation, documentation, and cross-functional collaboration.
